

Asbestos Awareness

Duration: Half Day

This course has been developed in house by our own expert staff and delivered by an associate member of UKATA. It has been designed to comply with the latest Health and Safety requirements regarding mandatory awareness training for certain trades and tasks.

Who should attend:

This course is aimed at anyone in a trade or industry who may come into contact with asbestos during their work and specifically, builders, electricians, plumbers, carpenters, painters and decorators, telecom engineers, alarm installers, maintenance staff, and anyone who disturbs the fabric of a building. This course would also be beneficial for Reactive Maintenance Managers, Housing Officers and surveyors

Topic areas covered:

- The properties of asbestos and effects on health
- Types, uses and risks of asbestos containing materials in buildings and plant
- General emergency procedures for accidental release of asbestos dust
- How to avoid the risk from asbestos

Objectives:

The successful completion of the training programme and assessment will enable candidates to understand

- The health and safety requirements placed on employers and employees
- Hazard and risk and the main causes of harm to workers
- Health, safety and welfare provisions in the workplace
- The importance of following safe systems of work, procedures and rules.

Delivery:

This course can be delivered at your premises at a time convenient to you. The programme is delivered over half a day and a Certificate of Attendance is issued.
